West College Scotland

Schools Vocational Programmes

Would you love to try something new at college? Ready to get hands-on with your learning? Welcome to our Senior Phase Programme - unlocking a world of possibilities at West College Scotland!

Explore a range of exciting subjects with endless possible routes to further study and career choices which you may not have had the opportunity to study at school. From vocational subjects to Foundation Apprenticeships, our courses are designed to give you a whole new learning experience outside of the school classroom, giving you a taste of college life while gaining a new, industry recognised qualification.

You will learn in our modern college campuses where we have award-winning salons, state-of-the-art workshop facilities, sector leading laboratories and more!

Our highly experienced teaching staff will help you to not only master the skills relevant to the course area you choose but also to develop transferrable skills to help you in the future as you enter the world of work and give you the opportunity to progress to further or higher education, so that you can achieve your ambitions, whatever your goals.

What are you waiting for?
Start your future at West!

**Check out
our Socials:**

West College Scotland

Foundation Apprenticeships

Learn the skills you need for the future, while you're still at school

What is a Foundation Apprenticeship?

A Foundation Apprenticeship is an SCQF Level 6 qualification. You can sit a Foundation Apprenticeship over two years, starting in 5th year or a shorter duration course starting in 5th or 6th year alongside your Highers and National 5s.

The difference is, you spend time away from school, at college and with an employer. So you get real, practical work experience.

- **Get a qualification that employers recognise and the skills you need to start a career in that industry**
- **Open up your options after school**
- **You get to work on real projects with an employer. Some of Scotland's biggest, best known organisations are involved, including Barclays, Network Rail and the NHS**
- **It's a chance to try a career out - so you can decide if it's right for you**

Where could a Foundation Apprenticeship take you?

Straight to Work

An FA gives you skills employers want – like timekeeping, problem solving, communication and teamwork.

You'll have connections with employers, work experience and qualifications recognised by industry.

All this looks great on your CV.

A Modern Apprenticeship

In the same subject: You could complete your MA quicker because you'll have completed some elements of the MA during the FA.

In another subject: You'll already have the experience of learning on the job. That looks good to employers who are recruiting MAs.

A Graduate Level Apprenticeship

You'll have the experience of learning through work – so you're ready to do it at a higher level.

With a GLA, you can take your studies further, even up to Master's Degree level. All while you have a job.

College or University

Foundation Apprenticeships are recognised by most Scottish universities and colleges.

CAR MECHANICS

Course Outline

Passionate about cars and the motor industry, this course is for you! Drive your ambition and get your hands dirty, with a practical approach to learning and assessment, including visual questioning techniques to stimulate your learning experience.

Learn in our state-of-the-art motor vehicle workshops and also make an portfolio to show what you've learned. You can do this on a phone, tablet, or laptop. You'll also get access to online course materials so you can study whenever and wherever you want so it would be helpful to have access to a laptop or smartphone and Wi-Fi.

The Motor Vehicle industry is really exciting! It's always changing and growing sustainably, making it a great place to build a future. Did you know it already employs over 800,000 people in the UK?

This course will help you to progress to further studies or in the future, a full time college course with our award-winning Motor Vehicle department.

Entry Level Recommended

Selection will consider each applicant's existing qualifications, experience, and interest in working in the sector. We would like you to have a minimum of 3 National 5 qualifications for entry.

Course Content

Get set to master exciting range of skills to progress in the thriving motor industry. From essential units in Health and Safety to covering tools, equipment and consumable materials for vehicle maintenance, you'll gain the basic knowledge to kick start your automotive career. You'll also cover engaging topics in the workshop such as vehicle paint preparation, paint spraying and masking techniques and primer preparation.

Progression

This course is an excellent starting point if you are considering full time college, including a progression route with West to study the IMI Certificate in Transport Maintenance.

Day

Wednesday/Friday

Time

1.45pm – 4.00pm

At West we are proud to have strong links with industry and have consistently linked many of our students to roles with local employers. Past students of the department have progressed to roles within Arnold Clark, Audi, Gormac UK, L&A Motors as well as many local garages.

Interview

Passing a pre-induction online test is required.

ACCOUNTANCY FOUNDATION APPRENTICESHIP

Course Outline

Take your first step towards becoming a sought-after professional in the world of finance. The Foundation Apprenticeship in Accountancy is ideally for pupils in S6 and takes 1 year to complete. The aim of the Foundation Apprenticeship Accounting course is to help you understand and use financial and management information. You will learn how to record and analyse financial accounting and bookkeeping.

The Foundation Apprenticeship in Accountancy includes the professional qualification of Association of Accounting Technicians, a Level 2 Certificate in Bookkeeping. This qualification allows for easy transition onto the MA or the GA in Accountancy.

Previous successful learners have gone on to employment with organisations such as KPMG and Morgan Stanley, or continued to study progressing onto HNC Accounting or Finance Degree programmes.

Entry Level Recommended

Achieved National 5 Maths or Application of Maths and English at grade A or B. National 5 Business Studies will be advantageous. Working at Higher level. There may be an element of independent online learning required.

Course Content

- ▶ **Preparing Management Accounting Information**
- ▶ **Analysing Accounting Information**
- ▶ **Preparing Financial Accounting Information**
- ▶ **Recording Transactions in the Ledger OR**
- ▶ **Professional Ethics for Accountants**
- ▶ **AAT Exams: Introduction to Bookkeeping and Principles of Book-keeping**
- ▶ **Work Based Challenge Unit - previous partners have included Johnston Carmichael Accountants, River Clyde Homes and NHS**

An application and personal statement will be required.

HNC BUSINESS

Course Outline

This award is designed to offer candidates who have completed their Higher in Business (or related subject) or who have a general interest in Business, the opportunity to progress to the next academic level. You'll gain not just knowledge, but real-world digital skills and qualities that employers look for.

From marketing to management, finance to entrepreneurship, the HNC opens a spectrum of exciting career paths. Plus, with our strong industry links, you're not just studying; you'll be networking with potential future employers!

Entry Level Recommended

Achieved 1 relevant Higher at grade C or above in Business Management, Modern Studies, English or Maths or Achieved 5 National 5s (3 grade A's & 2 grade B's) which must include Maths & English.

Course Content

The completion of an HNC requires a total of 12 SQA credits. The mandatory units (9 credits), include these essential subjects:

Mandatory Units

- Managing People & Organisations
- Marketing: An Introduction
- Economic Issues: An Introduction
- Business Accounting
- Business Communication
- IT in Business Spreadsheets
- IT Applicants Software
- Graded Unit

Optional Credits (2 further credits)

Depending on numbers in class, a variety of options may be offered including Law, Marketing or Human Resources.

Progression

HNC Business allows you to develop a broad range of skills required for jobs in a variety of industries including accounting, economics, marketing and entrepreneurship. You could develop your skills further by studying on HND Business or progressing to a range of advanced university courses.

COMPUTER GAMES DEVELOPMENT

Course Outline

Scotland is one of the world's most important games development clusters. It's home to world leading and successful studios, as well as employing over 2,300 creative staff in 162 studios. The games industry is currently booming and previous students from West have gone on to work for companies such as Rockstar and Cloud Imperium.

Get ready to level up your skills in Computer Games Development! This course is your ticket into the exciting world of games design, programming, and multimedia creation. From crafting immersive game worlds to bringing characters to life through captivating graphics and audio, you'll be at the forefront of the gaming industry's creative process.

Computer Games Development is an intensive course that calls for self-motivation and lots of enthusiasm! Get ready to unleash your creativity and master the art and science of game development.

Entry Level Recommended

You should preferably have or be working towards a National 5 in Mathematics and/or Computer Science and some experience of computer programming.

Course Content

You'll get hands-on designing game worlds, crafting stunning graphics and immersive soundscapes, and coding your very own masterpiece. From brainstorming game concepts to bringing them to life through pixel-perfect graphics and mesmerizing audio, every step of the journey will be an adventure waiting to unfold!

Unleash your imagination as you design, create graphics & sound media assets, and code your way to gaming greatness. Are you ready to level up and bring your dream game to life?

Progression

On completion you could progress to NQ Computing with Games Development or HNC Computer Games Development.

INTRODUCTION TO MIDWIFERY AND CHILDREN'S NURSING

Course Outline

Would you love to work in the midwifery and children's nursing profession? This introductory course will allow you to explore a career in this rewarding industry. The course consists of theory and practical sessions within the college, carrying out basic nursing skills such as bathing and feeding babies, care planning and communication skills.

You will also explore how to care for infants and children and the responsibilities and values of a health care professional will be addressed.

Entry Level Recommended

Working towards National 5 units.

Course Content

Welcome to the fascinating world of midwifery and child nursing! In this course, you'll delve deep into the art of caring for both mothers and babies, learning the essential skills needed to provide compassionate support throughout childbirth.

From mastering the intricacies of child development to gaining expertise in the care and feeding of little ones. You'll be equipped with the knowledge and confidence to make a real difference in the lives of families. But it's not just about techniques – we'll also explore the values and principles that underpin the bond between caregiver and child. So, if you're ready to embark on a rewarding adventure filled with love, learning and life this course is for you!

Progression

You can progress at college on to Level 5 Child, Health and Social Care or Entry to Early Education and Childcare or pursue further study into Nursing and Midwifery at university. In the future you could pursue a range of exciting careers in the health profession from midwife to health visitor or paediatric nursing.

Interview

A Personal statement and informal interview are required, and entry levels require to be met.

HIGHER CHILDCARE AND DEVELOPMENT

Course Outline

Considering a career in Primary Teaching or Childhood Practice? This SQA Assessed course enables you to understand child development from pre-birth to 16 and the roles and responsibilities of those who contribute to the development of children and young people.

You will gain understanding of the skills and knowledge that help you to contribute to the development of children in personal and professional contexts which will in turn support applications to further study in Education, Childhood Practice or Nursing.

Develop awareness of initiatives and/or strategies used to inform current childhood practice and the current services available for children and young people. Increase your understanding of child development and the factors that influence it from pre-birth to 16 as well as the theories of development and the way these are applied to working with children and young people.

Understand the role and responsibilities of professionals and others in contributing to the development of children and young people and develop invaluable skills of investigating, analysing, evaluating and presenting information.

Entry Level Recommended

You should either be working towards or have Higher English.

Course Content

You will cover key aspects of child development and the associated theories as well as gain understanding of the services available for children and young People. The course also involves an SQA assessed external project and final exam.

Progression

On completion you may wish to pursue further study in Childhood Practice practitioner award or may also use this course to support an application for a primary school teaching qualification..

HIGHER PSYCHOLOGY

Course Outline

The study of psychology provides an insight into some of the ways that thoughts and emotions can affect how we feel and behave. The course covers a range of topics and approaches within psychology and will help develop an understanding of the psychological study of the human mind and behaviour in a range of contexts, enhancing your ability to use evidence to explain behaviour.

It will use appropriate psychological concepts, theories, research methods and evidence to investigate and analyse internal and external influences on human behaviour in a range of contexts so you will be expected to be able to remember, explain and analyse a range of theories and research.

Entry Level Recommended

Achieved Higher English.

Course Content

Key topics include:

- Memory
- Aggression
- Stress
- Depression
- Sleep & dreams
- Conformity & obedience

This higher offers an understanding of psychology as the scientific study of the mind and behaviour. Psychology is a research-based subject, and it provides the opportunity to conduct practical research, including working with human participants in accordance with ethical standards to carry out an independent research assignment.

Progression

You can progress to further study at college to continue on a Level 6 Social Sciences & Criminology or HNC Social Sciences. You may also consider university routes. Longer term, the learnings could support you in a range of careers from clinical psychologist, counsellor, social worker, teaching, nursing or business – the possibilities are endless!

NPA CRIMINOLOGY

Course Outline

Criminology is the scientific study of crime, including its causes, responses by the criminal justice system, and methods of prevention. It is one of the fastest growing academic subjects in Scotland and the UK.

This National Progression Award (NPA) is designed to introduce you - at SCQF Level 5 - to a selection of topics and areas of debates that inform contemporary ideas of crime and justice.

Entry Level Recommended

You should have National 5 English and have a keen interest in the subject.

Course Content

Let's dive into some captivating subjects that unravel the mysteries of crime and society! Explore our essential unit of crime in the community, where we delve into real-life scenarios and discuss their impact. Investigate the fascinating world of criminology as we learn how to dissect crime scenes and piece together clues. Get involved in thought-provoking discussions about social issues in modern studies, shedding light on current challenges and debates. Get ready for an eye-opening journey into the heart of criminal justice and societal issues!

Progression

Advance to higher levels of education including an NPA at Level 6, PDAs at SCQF levels 7 and 8 or further study at college or university. Plus, gain practical skills sought after by employers, you could progress to roles in business, finance, public services, or law. Gain essential skills like communication and teamwork that will pave the way for diverse career paths in social work, teaching, policing, and more.

Your future starts here—explore the endless possibilities with Social Sciences!

HUMAN BODY STRUCTURE AND FUNCTION

Course Outline

Extend your knowledge and understanding of selected body systems and how the human body works with this SCQF Level 8 course. Explore how the body co-ordinates its systems to maintain homeostasis and discover what happens when things go wrong!

From exploring diverse conditions like hyperthyroidism and gigantism to understanding the complexities of coronary heart disease, get ready to learn more about the mysteries of the human body!

Entry Level Recommended

Open to S6 pupils. You must have achieved Biology or Human Biology Higher or be working towards Advanced Higher. You should have a genuine interest in human anatomy & physiology.

Course Content

Explore the inner workings of the human body covering topics such as the intricate structure & function of the skeletal system; the essential function of the blood and heart; respiratory system; urinary system and digestive system and hormonal and electrical signalling.

Get hands-on in our state-of-the-art laboratories with practical laboratory experiments, bringing science to life!

*Please note you will be studying an SQA double credit unit at SCQF level 8, this is not a Group Award.

Progression

The unit is an ideal progression route to university programmes in medicine and dentistry, as well as to biology-based degrees. Data handling, problem solving, and experimental techniques are all developed alongside expanding knowledge on anatomy and physiology. The career pathways are endless and ultimately you could work as a doctor, dentist, biomedical scientist, research scientist and more!

SKILLS FOR WORK ENGINEERING

Course Outline

Scotland's engineering and advanced manufacturing sector contributes £9 billion a year to the nation's economy. Careers in Engineering are on the rise and these jobs represent an exciting opportunity for young people in Scotland.

Unlock your potential with this hands-on course which covers the processes, tools, technologies and skills, common to all engineering and manufacturing practices. From mechanical to maintenance and electrical to fabrication, this dynamic programme will give you all the basics to get started in the ever-growing engineering sector.

As a predominantly practical course, most assessment is practical with some written and there are no formal exams.

Entry Level Recommended

Achieved National 4 Maths, English at grade 'C' or above (not Life Skill Maths) and working towards National 5 Maths. Science subjects also favourable.

Course Content

The course is comprised of 4 Mandatory units, and they are designed to substantially improve your practical skills by manufacturing several different items from a series of engineering drawings to within a given tolerance.

- Engineering Skills: Mechanical and Fabrication
- Engineering Skills: Electrical and Electronic
- Engineering Skills: Maintenance
- Engineering Skills: Design and Manufacture

Progression

You can move on to the Foundation Apprenticeship. This course has great success of student employment in a diverse range of sectors in the engineering industry including design, mechanical, maintenance, electrical, electronics, fabrication and manufacture. It includes industry tie-ins and a week's work placement with some of the biggest engineering employers in our local area.

ENGINEERING SYSTEMS FOUNDATION APPRENTICESHIP

Course Outline

Take the first steps towards an exciting career in Engineering! Explore the world of innovation, design, and cutting-edge technology with a Foundation Apprenticeship (FA) in Engineering. This SCQF Level 6 qualification is designed to provide you with theory, practice and related work experience, aimed at pupils in S6 and will take 1 year to complete. Bridge the gap between classroom knowledge and real-world application and explore behind the scenes with exciting trips, expert sessions, and cutting-edge technologies.

- **Real-World Skills:** Gain hands-on experience and knowledge that go beyond textbooks.
- **Build, Create, Innovate:** From designing futuristic structures to mastering the latest manufacturing techniques, this programme is your launchpad for creativity and innovation.
- **Endless Possibilities:** Open doors to a range of diverse industries, from renewable energy to space exploration.
- **Get Your Hands Dirty:** Learn by doing through projects, labs, and workshops, bringing theory to life.

Entry Level Recommended

Achieved National 5 Maths. Working towards Higher Maths and another STEM based subject would be advantageous.

Course Content

You will complete an NC Engineering Systems (SCQF Level 6) covering a range of engaging units. The Performing Engineering Operations Units will cover a wide range of essential skills, from the fundamentals of mathematics and engineering principles to the intricate workings of electrical and mechanical systems. From exploring the principles of single-phase and three-phase systems and the dynamics of rotating electrical machines; every unit is designed to equip you with the knowledge and expertise needed to thrive in the engineering field.

Progression

Many of our FA's have progressed to a range of universities including University of Glasgow, University of Strathclyde, University of the West of Scotland and Edinburgh University. Of the students that complete the FA 93% have progressed their Engineering interests into either further or higher education, or

CONSTRUCTION SKILLS FOUNDATION APPRENTICESHIP

Course Outline

The Foundation Apprenticeship in Construction Skills supports the commitment to provide relevant work-based vocational education and training as part of the senior phase curriculum. This will prepare you for direct entry into a career in the construction sector and other related occupations, by equipping you with the necessary skills and knowledge to work effectively. The overall purpose of the course is to ensure that you develop practical and technical skills, alongside the opportunity to develop your employability skills, supported through the delivery of project-based learning supported by industry, while still attending school.

Entry Level Recommended

Achieved National 4's Working towards National 5 Maths and Technical based subject

Course Content

The Construction Skills framework includes two core elements:

1. National Progression Award in Construction Skills (SCQF Level 5) in which there are three units which must be completed to gain the Group Award.

You will develop bench joinery skills, manufacture joinery components, learn decorative treatments and complete a built environment design project.

In doing so you will learn efficient construction practices and grow your employability and behavioural skills preparing for the world of site work.

2. Work Based Challenge Unit has been designed to support the delivery of the National Progression Award. Supported by an employer this unit complements the learning outcomes within the NPA units. Previous industry partners on this unit have included Taylor Wimpey and Morrison Construction. The employers provided construction site visits and the opportunity to get hands on with a live work-based challenge project.

The WBCU has been designed to support the delivery of the National Progression Award. Through the project, you will be asked to reflect on your meta-skills development and record this alongside your evidence base. Reflective practice is therefore central to the development of meta-skills throughout the project.

SCQF Level 5

Day

Tuesday/Thursday

Time

1.30pm – 4.00pm

Progression

Following successful completion of the course you will be eligible to apply for full-time college courses in a range of construction trade disciplines. You could also consider a Modern Apprenticeship in the Construction and Building Services industry. Graduates from West have gone on to a range of trade roles including plumbers, electricians, joiners, painting, and decorators and more.

An application and personal statement may be required.

SKILLS FOR WORK CONSTRUCTION CRAFTS

Course Outline

Scotland's construction sector is so important to the nation's economy with jobs in the industry ever in demand, employing nearly a quarter of a million people in Scotland and contributing billions to its economy. The construction industry also plays a key role in achieving the Scottish Government's ambitious housing, energy, and climate change targets.

If you are interested in pursuing a trade as a career but not sure where to start, this is an ideal course for you! Allowing you to explore each of the main trade areas and get hands on with your learning, this is a very practical course where you have the opportunity to work in variety of workshops producing products and models that are accepted as being completed to industry standards.

Entry Level Recommended

Working towards National 5 Maths and English and a genuine interest in the construction industry.

Course Content

Covering the basics of construction, with an introduction to brickwork, as well as the chance to increase your site carpentry skills with bench joinery. You can get creative with decorative painting and you will also gain personal development skills and employability and behavioural skills which are necessary for the world of work.

Progression

Following successful completion of the course you will be eligible to apply for a range of full time college courses such as Pre-Apprenticeships in Electrical Installation, Insulation and Sustainable Heating and more. You could also consider NC courses in Renewable Energy or Built Environment or pursue an apprenticeship in the Construction industry. Graduates from West have gone on to a range of trade roles including plumbers, electricians, joiners, painting and decorators and more.

SOCIAL MEDIA & ANIMATION

Course Outline

Social Media is everywhere and is used to interact and promote a wide range of hobbies, interests, sports, arts, business and general communication, on a daily basis, worldwide. This course will help you to create animations and content to promote your area of interest through inclusion within a social media context.

You will look at social media platforms, tools, methodologies and etiquette, whilst creating your own social media platform. You will learn about the basics of animation through use of animation software and how this can be used to maximise the effect of promoting your social media platform.

You will also learn how to use film, audio, photography and digital art software to create content for a website.

Entry Level Recommended

Working towards National 5s.

Course Content

Immerse yourself in the captivating world of animation as you explore the fundamentals of this exciting skill, unleash your creativity through art and design projects, and dive into the realm of interactive multimedia for web development research.

Progression

You could progress at college to an NC Media or NC Graphic Design. In the future you could explore exciting career paths such as a social media manager, content creator or digital marketing specialist. In animation, your skills could lead you to roles such as animator, graphic designer, storyboard artist, or visual effects artist. These fields offer a wealth of opportunities to showcase your creativity and make a real impact in the digital world!

HIGHER DANCE

Course Outline

Are you passionate about dance and excited to create something new and dynamic? This course is perfect for you! Dive into a variety of dance styles, including Jazz, Contemporary, and Commercial, while exploring how choreography brings creative ideas to life. Whether you already have some experience, or you're eager to learn, this course will help you develop your skills and confidence.

You'll work closely with others, especially on choreographic pieces, so full attendance and a commitment to teamwork are essential. Throughout the course, you'll receive guidance to plan, develop, and evaluate your performance while tracking your progress every step of the way.

As part of the experience, you'll enjoy exciting opportunities like attending theatre trips and workshops, including the renowned Scottish Ballet Highers' Day. This is your chance to express yourself, collaborate, and grow as a dancer!

Entry Level Recommended

A reference is required for this course.

Course Content

The course covers choreography, technical skills, and dance appreciation, helping you develop your creativity, performance, and analytical abilities.

Progression

Upon completion, you can progress to NC Dance, then the HND Dance programme, further developing your technical and creative skills. From there, you may have the opportunity to advance to university, pursuing a degree in dance or related fields, and continuing your journey towards a professional career in dance.

Interview

Entry is by audition and interview only, this will involve: a practical dance class, a group presentation about the course and content, a written short answer paper. The practical class requires that appropriate dance clothing should be worn.

NPA PROFESSIONAL COOKERY

Course Outline

Mix up your catering career in the kitchen with our NPA. If you've got a passion for food, then this introductory course is perfect for you! Develop your cookery skills in our professional hospitality kitchens. From mastering essential techniques to plating up delicious dishes like a pro, you'll be immersed in a realistic working environment throughout the academic year.

This is not a leisure course, it is intended for pupils who wish to work in the industry and classes take place in a commercial kitchen in the college. It gives you the skills required for future employment within the bakery or catering industry or for progression to further academic qualifications.

Entry Level Recommended

No formal qualifications are required however experience of a hospitality or home economics related subject would be helpful.

Course Content

The core units will cover craft baking, an introduction to bread making, cake decoration and pastry progression. Get started with the basics of food preparation techniques and ensure your dishes are not only delicious but also safely prepared with a unit covering food hygiene for the hospitality industry, where you'll learn the ins and outs of maintaining impeccable cleanliness in the kitchen.

Progression

Choose from a range of hospitality college courses to further your studies. Ultimately you could pursue a fast-paced career in the culinary world, becoming a chef or baker! Many of our graduates have gone on to work for leading restaurants and hotels around the world with one of our past students even becoming a Masterchef: The Professionals finalist!

Frequently Asked Questions

How do I get there?

If transport is required, this is organised through your school and will take you back to the nearest point to your home at the end of the day. For Foundation Apprenticeships travel expenses will be provided for work placements located more than 2 miles from your home.

How are these programmes different from the subjects I take at school?

The main difference is that you will spend time at college while working towards qualifications at SCQF Level 4, 5, 6 or 7.

How will the courses be certified?

You will receive a certificate from the relevant awarding body (SQA, IMI etc.).

So what are the benefits?

Whether your next step is into the workplace, starting on your apprenticeship journey, or progressing to further study at college or university, this qualification will help you make that next big move. As well as your qualification, you'll gain essential skills like communication, teamwork, and problem-solving—tools that will set you apart and help you excel in the dynamic world

of work. You'll also get the chance to experience learning outside the school classroom, getting a taste for college life and a different style of learning from our award-winning lecturing team.

Who do I contact if I have a problem while at College?

Please contact the relevant person below:

Kelly Ewing

School Liaison Coordinator

t: 0141 581 2139

m: 07809 507 410

e: kelly.ewing@wcs.ac.uk

Katrina Maxwell

Foundation Apprenticeship School
Engagement Coordinator

t: 01475 554030

e: katrina.maxwell@wcs.ac.uk

It sounds great - how do I apply?

Places are limited, you should speak to your guidance teacher as soon as possible. You should also read the option details for your choice of course and discuss this with your parent or guardian.

For Foundation Apprenticeships you must apply online through the West College Scotland website.
